## In Salon Treatments

### Nanoplastia

Nanoplastia is a revolutionary, thermal sealing, formaldehyde-free product with up to the minute technology. It is capable of completely straightening the hair for up to five months. It can also be used as an anti-frizz service.

Our product uses high technology silsoft combined with blend of natural sealing resins and glyoxylic acid, promoting the uniformity of the cuticle surface, capillary sealing and softness and shine.

- Straightens hair 100% for up to 5 months.
- Can be used on all hair types.
- Smooth and high-shine finish.
- Does not burn the eyes or effect the respiratory system.
- You can colour the hair and even lift up to 1 level, immediately after the service.
- The hair can be washed the same day after the treatment.
- It does not produce a strong smell.
- You can style hair as desired, and it will not damage the effect of the treatment.

**Sizes Available: 1000ml – 300ml**

### Clarifying Shampoo

Deeply cleanses the hair, removing the heaviest of product residues, dirty or oily hair. It promotes the dilation and cleansing of the cuticles.

Enriched with Cocoa Extract and Coconut Oil, it leaves the hair clean and shiny, ready to receive the treatment.

**Sizes Available: 1000ml – 300ml**

### Smooth Mask

Developed with polyphenols from Tamarind Mousse, it conditions and promotes hydration in all hair types. Excellent emollient and lubricant action contributes to an intense anti-frizz and sealing action. This helps with protein fibril alignment, providing softness and shine, whilst promoting a smoothing action on the cuticular surface.

Acidic pH balances the hair's pH, leading to the sealing of the cuticles, thus providing smoothness, reducing frizz, and volume.

Can also be used as a top-up service for nanoplastia clients after 6 -9 weeks.

**Size Available: 1KG**

## Repair & Protect

This two-phase treatment is enriched with an exclusive combination of vegetable proteins, amino acids and keratin. A truly amazing hair reconstructive treatment.

Exclusive formula and active ingredients provide nourished and hydrated hair, whilst rebuilding the internal structure by filling the open spaces of the hair cuticles, resulting in a reduction in porosity. This is a must for dry and damaged hair.

### Step 1

- Reduces breakage
- Restores moisture
- Improves hair texture
- Strengthens hair
- Anti-porosity action

### Step 2

- Improves elasticity
- Rebuilds hair bonds
- Deep repair
- Deep hydration
- Cuticle sealing

Sizes: 2 x 500ml

## No Frizz

This product really does what it says on the tin.

SILSOFT CLX-E is smart technology with a special silicone giving a smooth effect and maintenance for all hair types. Continuous use provides alignment of the hair fibre, repairs, helps reduce drying time, and provides thermal protection.

When heat activated with the use of a dryer or flat iron, it maintains a long-lasting smooth effect on the hair and a significant reduction in frizz even after washing. Contains excellent natural moisturisers, protecting the hair from free radicals and oxidation, preventing accelerated hair aging, and improving the appearance of the hair.

Sizes: 250ml

## In Salon & Home Maintenance

### Argan Oil Shampoo

Enriched with argan oil, rich in fatty acids, and essential nutrients, this product gently cleanses the hair, while it's high moisturising power transforms dull and brittle hair, leaving it shiny and hydrated.

- Apply on wet hair, massage and rinse.
- Protects the hair from chlorine after swimming.
- Promotes hydration and shine.

Size: 500ml

## Argan Oil Conditioner

Enriched with argan oil and rich in fatty acids and glycerine, Argan Oil Conditioner penetrates the hairs cortex, providing strength and resistance to weak, damaged hair. It also revitalizes the cuticle, fortifying the hair and promoting nutrition. The product will return moisture lost in chemical processes, leaving hair naturally smooth and soft.

Apply after using Brazilian Nano Argan Shampoo, massage in, leave for 2 – 3 minutes and rinse fully. Leave it on for 10 minutes for better results in terms of smoothness and shine

**Size: 500ml**

## Protector Prime

This multi-functional product was made using vegetable proteins, shea butter and amino acids. Great for repairing split ends, reconstructing the hair, and bringing back shine and manageability, leaving it soft and smooth.

- To use as a treatment for damaged or aging hair simply spray product on after shampooing and before applying a mask (for extra conditioning). Stylists can even use this as a cutting tool.
- If using as a thermal protectant, simply shampoo the hair, towel dry, spray the product on, comb it through, blow dry, and style as desired.

**Size: 250ml**

## Hair Serum

Contains botanical extracts such as Green Tea, Chamomile and Rosemary associated with Bioester Oils from Rice Wax and Turmeric Roots. Bioprotective antioxidant nourishes, provides shine and softness to the hair. It also improves natural colour or tinted hair with excellent thermal and solar protection.

- Simply spread in the hands and distribute throughout lengths and ends of dry or towel-dried hair.
- Can be used before blow drying and flat ironing.

**Size: 100ml**

## Anti Humidity Spray

Panthenol maintains the right degree of moisture, combined with special polymers making this spray effective and specific for creating a protective sheath over the hair against humidity. It is non-greasy, non-sticky, and creates an anti-frizz shield.

Perfect in humid climates to protect and maintain your style. Simply shake well and apply to your hair as a final layer before going out. It also has a very light fixing power.

- Paraben Free
- Thiazolinon Free
- Colouring Free
- Mineral Oil Free

**Size: 200ml**

## Style & Hold Spray Wax

This lightweight yet firm modelling spray wax will define, texturise, and hold your hair in place, without weighing it down.

It is perfect to achieve natural movement and definition for any style. It can be used as an all over hair styling spray, or in certain areas for precise definition. Simply shake well and apply to damp or dry hair.

- Paraben Free
- Thiazolinon Free
- Colouring Free
- Mineral Oil Free

**Size: 200ml**

## Polished Shine Spray

A combination of special polymers and Argan Oil (from organic farming) works instantly, giving hair a shiny and silky finish. This spray has an ultra-light formula - the argan oil nourishes the hair whilst preserving its internal moisture.

Using vegetable alcohol, latest generation resins, and polymers along with aloe vera, this product provides a marked moisturising action. Simply shake well and apply to the hair as a final touch.

- Paraben Free
- Thiazolinon Free
- Colouring Free
- Mineral Oil Free

**Size: 200ml**

## Flexible Hold Volumising Hairspray

This Texturising Hairspray gives your look long-lasting control and high shine.

It dries quickly and sets naturally without leaving residue. Excellent for all types of hairstyles, with an extra strong hold. It is also ideal as a working spray.

The special dispensing valve gives you maximum control to create the styling you want.

Using Vegetable Alcohol; latest generation resins and polymers along with Aloe Vera, it provides a marked moisturising action.. It also contains Green Tea with protective and antioxidant properties, along with Panthenol (ProVitaminB5): for moisturising and soothing.

- Paraben Free
- Thiazolinon Free
- Colouring Free
- Mineral Oil Free

**Size: 300ml**

## NANOPLASTIA V KERATIN TREATMENT

### **Nanoplastia**

A new type of straightening, Nanoplastia is a new hair alternative to a keratin treatment with a more organic formula. Nanoplastia achieves the same or an even better result than a Keratin treatment, which is to permanently straighten hair.

Nanoplastia treatment restores dry and porous hair, leaving it with a bouncy, soft and silky appearance. The chemical composition is made up of a vegetable protein, and a blend of natural sealing resins and lactic acid that promote uniformity of the cuticle surface. The products for Nanoplastia are saturated to the maximum of beneficial substances and supplemented with harmless chemical elements that facilitate penetration into the hair and interact at a cellular level. The formula for this procedure is rich in vegetable protein, which under the action of temperature, penetrates the cortical layer of the hair. As a result, the structure of the hair becomes strong, and the nutrients are integrated in the hair, strengthening, and healing it from the inside.

Benefits of Nanoplastia:

1. Does not harm the health of the professional.
2. The acid has no smell, does not fume, create burning in the eyes or any type of discomfort for the professional and client.
3. Does not deform the hair fibre.
4. Allows the neutralisation of oxidative points through nutrition.

### **Keratin**

Some Keratin treatments have substances that can be aggressive, leading to possible damage to health and hair such as deformations in the hair fibre, making the strands more fragile and brittle.

For those containing formaldehyde or derivatives of, when the heated formaldehyde linked to the cuticle proteins, to the hydrolysed amino acids in the keratin solution, can cause the hair to become plasticised, making it impermeable. This can making the strands more fragile and brittle, due to the fact that the strands become platy, preventing hydration of the hair strand.

## Brazilian Nano

### **Ingredients**

- Butyrospermum Parkii (Shea) Butter: A natural ingredient that helps to moisturise and nourish the hair.
- Tamarindus Indica Fruit Extract: An extract derived from Tamarind fruit which is native to tropical regions of Africa, but is also widely cultivated in many other parts of the world, including Asia and Latin America. Known for its moisturising properties.
- Cocos Nucifera (Coconut) Oil: It is a natural oil that helps to moisturise and nourish the hair.
- Avena Sativa (Oat) Meal Extract: It is an extract derived from oats, which is known for its soothing and moisturising properties.

## Tree Resins

- Commiphora Myrrha Resin Extract: This resin comes from the Commiphora myrrha tree, which is native to regions in Africa and the Arabian Peninsula.
- Myroxylon Balsamum (Balsam Tolu) Resin: The resin is derived from the Myroxylon balsamum tree, commonly known as the Tolu balsam tree. It is found in Central and South America.
- Styrax Benzoin Resin Extract: The resin comes from the Styrax benzoin tree, also known as the benzoin tree. It is native to Southeast Asia.
- These plants have been used for their aromatic and therapeutic properties for centuries.
- Resins used in hair help to relax and loosen the hair's natural curl or wave pattern, making it easier to straighten. These resins also provide a protective coating on the hair strands, which can help to reduce frizz, seal in moisture, and provide shine. Additionally, resins can enhance the overall smoothness and manageability of the hair.

To become a certified user and/or stockist, simply contact us on one of the options below.

## Let's Talk Silicones

Although silicone has its disadvantages in our industry there's nothing dangerous about this hair care ingredient when used correctly. In fact, it plays an important role combined with all the natural tree resins, and naturally sourced ingredients.

### Silsoft

Silsoft is a silicone-based conditioning agent which is required to help improve the smoothness, softness, and manageability of the hair. Silicones like Silsoft can provide protective barrier helping to make Brazilian Nano last for 4-6 months depending on hair density & texture.

### Polysilicone-29

Polysilicone-29 provides shine, detangling and de-frizzing benefits to the hair. It is quaternary ammonium compound that forms flexible films with mild conditioning benefits in rinse off and styling applications. It provides instant detangling and also makes it so much easier to comb your hair. In addition, it adds a layer of thermal protection to your hair when using a hairdryer or straighteners.

## HOW TO USE

### ***Nanoplastia***

- 1 Apply to dry hair:  
(If the client arrives with a build-up of products, then wash and dry the hair completely before applying)
- 2 Divide the hair into 4 sections.
- 3 With a brush, apply the product a 1/4 inch away from the scalp through to the ends.
- 4 Let it process for 30 minutes for anti-humidity and frizz reduction.
- 5 For smoothing and straightening 40 to 60 minutes (60 minutes on very resistant hair)
- 6 Thoroughly rinse only with water, completely removing the product from the hair.
- 7 Blow-dry the hair completely, brushing the hair so that it is well aligned.
- 8 In small and thin sections, flat iron the hair slowly between 7 to 12 times.
- 9 If applying to blonde or high-lifted hair then add 1 part of Charcoal Conditioner, to 4 parts of Nanoplastia.

#### ***Instructions if using on blonde or high-lifted hair or colouring and smoothing on the same day.***

- 10 Bleaching / High Lifting; First, bleach / high lift the hair, wash the hair completely to remove the bleach/ colour. Dry the hair 100%. Then apply Nanoplastia, adding our charcoal conditioner if required (as 9)
- 11 Colouring: After the Nanoplastia treatment is completed, wash the hair with shampoo and then do not use conditioner (make sure that is NO PRODUCT OR RESIDUE in the hair) and then colour the hair as normal. You may lift the hair up to 1 level
- 12 Damaged Hair: You may still complete a Nanoplastia treatment, however, firstly, wash the hair and then towel dry.

- Apply RP (Repair & Protect) Stage 1 (Anti-Porosity) and process for 10 minutes.
- Completely rinse out the RP Treatment.
- Blow-dry the hair 100% then proceed with your Nanoplastia treatment.

*Always Wear Protective Gloves When Applying – Skin Test Prior To Application.*

## **HOW TO USE**

### ***Smooth Mask***

- 1 - Wash the hair with Anti-Residue Shampoo
- 2 - Dry the hair 100% and divide the hair in 4 sections
- 3 - With a brush, apply the product a 1/4 inch away from the scalp, until to the ends
- 4 - Let it act for 20 to 40 minutes
- 5 - Thoroughly rinse only with water, completely removing the product off the hair
- 6 - Divide the hair into 4 sections and blow dry. Drying the hair 100%
- 7 - In small and thin sections, flat iron the hair slowing between 3 to 5 times

### ***Clarifying Shampoo***

- 1 - Apply the required amount of BN Clarifying Shampoo to damp hair
- 2 - Gently massage the strands. It is not necessary to rub the scalp
- 3 - Repeat the application if necessary

### ***No Frizz***

- 1 - For Normal to Thick Hair: Shampoo hair, towel dry, spray on product, blow-dry, and style as desired
- 2 - For those with Fine or Thin Hair: Spray product on Dry hair, massage in, then, shampoo, blow dry and style as desired

### ***Home Maintenance***

To maintain and guarantee all Brazilian Nano treatments and services, use Brazilian Nano Argan Oil Shampoo and Conditioner.

Brazilian Nano styling and finishing products, will enhance your treatment or service, giving you longevity and amazing looking hair

## Top Tips

### **Nanoplastia**

- Make sure the hair has absorbed the product due to the variation in each hair type and porosity.
- Leave the hair very well moistened with product.
- No heat needed.
- Only put on a plastic cap if you are in a very dry environment.
- Some customers may notice 1 level of lift of their colour with this service, not all but some depending on client's hair colour and texture.
- We don't recommend colouring and smoothing on the same day if the customer doesn't have healthy hair.
- For dark colours, first smoothing complete service including passes of straighteners and then start the colour process.

### **Smooth Mask**

- To avoid losing the curls, reduce the pause time to 20 minutes and do not use the flatiron, just dry with a hairdryer.
- No heat needed.
- Only put on a plastic cap if you are in a very dry environment.

### **Education & Certification**

- Brazilian Nano comes with a full training and education programme, which leads to you becoming a fully certified stylist and/or salon. Our on-ongoing education, both online and in person, ensures your continued advancement with Brazilian Nano.

#### **To become certified, you will need to:**

- Either attend an online education session *OR* an in-salon education session.
- Perform a treatment.
- Provide 3 images (before, during and after the treatment).
- Supply your salon consultation notes and include which techniques you used and why?

## Vicky Bryce

Uk Education Manager

---

“The Brazilian Nano blowdry has transformed my client's life in amazing ways. She used to struggle with frizzy, unmanageable hair, which left her feeling frustrated. Now, her hair is smooth, shiny, and easy to maintain, cutting her styling time significantly.

This has boosted her confidence, allowing her to embrace her natural beauty without worrying about humidity or bad weather. The Brazilian Nano blowdry has truly been a game-changer for her!”

## Kym-Lee McCullough

Infinity SMP Hair

---

Having studied this type of treatment over 15 years ago and began using I have struggled with the smell/longevity/kindness of a product. In all my years of offering such treatment BN takes the lead. This treatment not only offers Smoothness, Sleekness & Manageability it also so offers longevity with such a beautiful long lasting shine. Very happy to be a part of such fantastic all rounded brand!
